Recruting Management System

Abstract

In RMS (Recruting Mmanagement System) we degine a end to end system starting from applying for a job to Sucessful onboarding process , assigning a department etc.

It make both applying for a job to onboarding process very smooth for applicant .

In this system we integreate a HRMS (Human Resource Management System) which is a need of every orginantions to preform a various activity.

For above System database schema is given blow.
